(54) Title: TELEVISION PRODUCTION TECHNIQUE

(57) Abstract: A television production system (300) affords simplification over the automation of a television program such as a news program by making use of State Memory Objects (S-MEMS), each defining one or more operations for execution by one or more production devices. The S-MEMS serve to control one or more actuators on a control panel (302) so that each actuator on the control panel can control different function of different pieces of production equipment depending on the S-MEM selected.

**(48) Date of publication of this corrected version:**  
16 March 2006

**(15) Information about Correction:**  
see PCT Gazette No. 11/2006 of 16 March 2006, Section II

*For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.*
